Software Design User Story Mapping Assignment 1
1.1 Goal
The Friendly Buddy app was created to help students at INTI Penang meet more
people on campus. Today's students have relatively small social circles and only
know their class mates. Encourage college students to make more friends, $$
particularly individuals who have various hobbies and personalities. The friendly
buddy app can help students locate friends who share their interests and can help
timid and introverted students connect with others online. Students at INTI Penang $$
can get to know one another better thanks to this app.
4 1.2 User
Users of the Friendly Buddy App concentrate on INTI students in order to reduce the
gap between them and introduce them to more individuals in various professions. By $\frac{1}{2} \left( \frac{1}{2} \right) \left( \frac{1}$
using this app, students can get to know one another better and discover their
common interests and classes. Additionally, you might learn from it and their your $% \left( 1\right) =\left( 1\right) \left( 1\right$
career.
1.3 Values and Benefits
The primary benefit of utilising the Friendly Buddy App is that students at Inti Penan
can make more new acquaintances and expand their social networks.
To extend their horizons is the second. Students from other areas can interact with $% \left( 1\right) =\left( 1\right) \left( 1$
one another to pique their curiosity and inspire a desire to learn more about subject
that are typically unattainable.
The Friendly Buddy App's third and final advantage is that it fosters social skills. Due
to the outbreak, students have been staying at home for far too long and haven't
socialised, making them feel very uncomfortable and frightened. If INTI Penang $$
students are permitted to use this app to connect with others and make friends, it $% \left( \frac{1}{2}\right) =\left( \frac{1}{2}\right) \left( \frac{1}{$
must enhance their social skills.
